

Single Crate Filler type CF 2080

Example shown, built to handle gable top cartons.

Typical application

To be used for high speed batch loading of products into crates.

Process

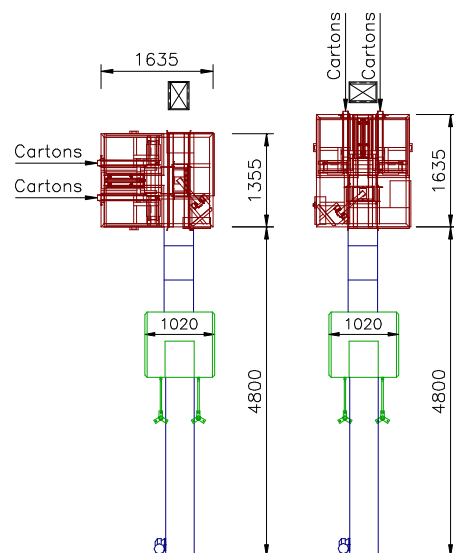

The products are pregrouped on an accumulation table and then side indexed into the gripper mechanism which then grips and transports the product down into the crate while the next loading of products is pregrouped.

Technical specifications

- Body section is constructed in stainless material.
- Packs up to 8000 1 products per hour.
- Crate max width up to 500 mm.

Dimensions (l*w*h)

- Crate filler CF2080 1635 * 1355 * 1700
- Crate stacker 950 * 1020 * 1800

Possible installation footprint of a Crate Packer in line with a Crate Stacker
