

Pot Packer type PP 2140

For yoghurt and desert packs.

Typical application

To be used for High speed loading yoghurt and desert pots into crates or trays of any material.

Process

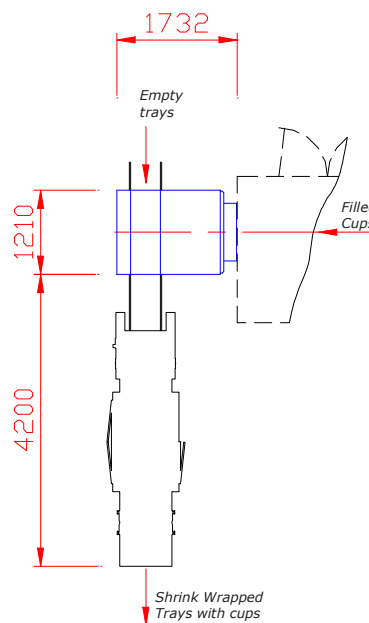

The items are conveyed into the machine on a wide belt conveyor direct from the discharge conveyor of the filling machine. Cups are pre-grouped according to the required packing pattern. The products are lifted into the crates/trays with a vacuum head. Separators can be placed automatically between each layer if required.

Technical specifications

- Body section is constructed in stainless material.
- Packs up to 7 trays per minute
- Item wide up to 100 mm.
- Automatic detection of missing lid
- Working with crates/trays made of plastic or carton

Dimensions (l*w*h)

- Pot Packer 1735 * 1210 * 1880 mm

Typical installation shown with an Ancram Shrink Wrapper type SW2018 and a Cup filling machine
